

Token sheet

Every value below is a lookup, not a judgment call. Private workspace and public feed share these same tokens — they differ only in which values each screen reaches for.

1. COLOUR

Ink
#1A2233
text, primary

Paper
#F4F5F7
page background

Brand
#3B5BA5
links, CTAs, focus

Positive
#1C8B6E
up, better, more — always paired with ▲

Negative
#C4562A
down, worse, less — always paired with ▼

Flat
#6B7280
no change — paired with ■

Positive/negative are teal vs. burnt-orange, not green vs. red — readable under deuteranopia and protanopia. But colour is never the only signal: every positive/negative/flat value gets its arrow glyph (▲ ▼ ■) beside it, no exceptions. Surface tint (private workspace card background) is Paper mixed 4% toward Ink — not a separate hex, a rule: `#ebedef`.

2. TYPE SCALE

System stack only: `-apple-system, "Segoe UI", Roboto, Helvetica, Arial, sans-serif`. Every figure — anywhere it appears — is set with **tabular-nums** so columns of numbers align. Prose never gets tabular-nums.

Display Figure	34%	48/700, tabular. The one headline stat.
Metric	1,284	20/600, tabular. Table cells, KPI cards.
Body	Fridays are busier than Tuesdays.	16/400. Findings, prose, form labels.
Eyebrow	THIS WEEK	13/700, tracked +0.08em, caps.
Caption	Based on 6 months of receipts	13/400, muted. Timestamps, sourcing.

3. SPACING, RADIUS, BORDER

Spacing — reach for 3 values

8px — inside dense private table rows / chip padding

16px — default gap, form fields, card padding

24px — between sections, public feed rhythm

Radius & border — sharp

4px + 1px hairline — private: inputs, table cells

8px + 1px hairline — private: buttons, cards, chips

16px + no border, soft shadow — public: feed cards only

4. SIGNATURE ELEMENT — THE DELTA CHIP

▲ 34% busier on Fridays

▼ 12% slower on Mondays

■ 2% flat vs. last month

One shape, everywhere: **arrow + number + plain-language comparison**, pill-radius, tinted fill of the semantic colour at 10% opacity, full-strength text for the number only. It appears identically in a dense private table cell and as the headline of a public feed card — same radius, same weight, same colour rule, just bigger type in public. This is the one thing InsightFlow is remembered by: *every number comes with its sentence attached*.

5. PRIVATE WORKSPACE VS. PUBLIC FEED — SAME TOKENS, DIFFERENT REACH

Private — dense, functional

TOP ITEMS		
Cheeseburger	142	▲ 8%
House Salad	88	▼ 5%
Iced Tea	61	■ 0%

Surface tint, 4px radius, 8px internal spacing, hairline borders throughout.

Public — calm, readable

▲ 34%

Fridays are 34% busier than Tuesdays here.

Order more stock on Thursday. Shared by Rosa's Kitchen.

Paper bg. 16px radius, no border — shadow instead, 24px breathing room, larger type.
